Autumn Term 2
The Jolly Postman

Miss Boyce
Miss Pudney
Mrs Jimenez

Physical Education

P.E sessions will be on a Wednesday and Friday.
Please make sure that earrings are removed and hair is tied back on these days.

English

In English, we will be practising writing on the lines and learning where ascenders and descenders sit. We will practise forming lower-case letters in the correct direction, starting and finishing in the right place.
We will be joining words and clauses using 'and', as well as practising punctuating sentences using a capital letter and a full stop. We will be sequencing sentences to form short narratives whilst we learn all about the Jolly Postman's journey and the characters he meets along the way.
In Phonics, we will be beginning Phase 4; learning to blend more difficult words and make phonetically plausible attempts at spelling longer words.

Computing

We will begin to understand what algorithms are and that programs execute by following precise instructions.
We will input instructions into the BeeBots.

PSHE

We will be learning all about our feelings and emotions.

Geography

We will continue to learn about maps. We will create our own maps for the Jolly Postman and our own fairy tale maps using a key and symbols. We will also be looking at compass directions, using directional language and looking at difference perspectives.

Religious Education

We will be learning about important celebrations in Christianity and Islam. We will be learning about Christmas and Eid, as well as the importance of the cross to Christians.

Science

In Science we will learn to identify and describe the basic structure of a variety of common flowering plants, including trees.
We will also observe changes across the four seasons. We will observe and describe weather associated with the seasons and how day length varies.

Maths

In Maths we will be recapping finding one more and one less than a given number to 20 and comparing numbers using mathematical language 'greater than, less than.' We will continue to practise our number formation to 20.
We will also be adding and subtracting one-digit and two-digit numbers to 20, including 0. We will use concrete apparatus and number lines to support us.
We will be learning how to describe position, directions and movements. We will also be learning to recognise and name common 2-D and 3-D shapes.

Design Technology

We will be exploring moving picture books and learning to use different mechanisms to create our own moving pictures. We will evaluate existing products and be designing and making our own.

Art

We will be using different materials and techniques to create our own artwork based around fireworks night and Christmas.

Music

In Music, we will use our voices expressively and creatively by singing songs, chants and rhymes.
